

Electrical and C&I

RULA has the in-house capabilities to do complete Design ,engineering and Project management on Electrical and Instrumentation systems ranging from load calculations, switchgear and PLC's to software developing and operator station configuration.

We provide full documentation back up such as:

- Instrument lists
- IO lists
- Single line diagrams
- Flow (P&ID) diagrams
- Cable schedules
- Wiring diagrams
- GA drawings
- Any other documentation as required

We have a permanently employed team of skilled people to do workshop manufacturing and assemblies according to approved designs. All equipment undergo a thorough in house factory test to comply to our proven Quality system.

We have a team of skilled people to do on site electrical and instrumentation construction work such as equipment installation, cable racking, cabling and terminations.

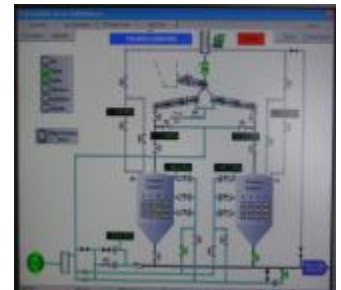

We do complete cold and hot commissioning of installed plants including loop checks, cable and motor testing.

For bigger projects, we make use of reliable sub-contractors that have provided us

Electrical Box - Manufactured

PLC Control

Silo Discharge arrangement with Flow Control Valve & Knife Gate Valve

Electrical System Upgrade

PLC - Manufactured
